QUALITY POLICY

All 01.05

Pag.1

The policy of the MINSAVIT S.R.L. company is to pursue and achieve the following objective:

maintain and grow an innovative company oriented towards the future, to successfully face market challenges, increasingly improving its competitiveness and consolidating its image. MINSAVIT S.R.L. is globally committed to a continuous process to achieve quality objectives. It is an objective of primary importance for the company that its products comply with all the requirements required by the market, contracts and technical specifications, with reference to:

- obtaining the established quality level while containing production costs;
 - prevention of defects;
 - individual responsibility for the quality of work;
 - recording and availability of data relating to quality controls as objective proof of product quality;
 - commitment on the part of each company function to constantly satisfy the needs of all our customers;
 - raising awareness of the main suppliers in order to achieve continuous improvement in the quality of the products supplied.
- Minsavit S.r.l. plans its processes with a risk-based thinking (RBT) approach in order to implement the most suitable actions
- to evaluate and treat risks associated with the processes and conditions in which it operates
 - to exploit and strengthen the opportunities identified

Minsavit S.r.l. promotes an adequate sense of proactivity at all levels in managing one's risks.
